

COURSE SYNOPSIS

Web Portfolio Management

duration 1 day

An introduction to the concept of Project management by portfolio. This course covers the advantages to be gained from the creation and management of portfolios using Primavera P6. You will learn the concept of reporting using dashboards to enable the performance of a portfolio to be viewed by others. Learn how to select the data appropriate to different groups together with appropriate presentation formats. Learn about the functionality, purpose, benefits and usage of the web interface, and how to use the analytical, presentation and viewing tools in order to ensure the appropriate data is selected and presented to the best effect.
